

### Letter of Recommendation for Sketch Gustafson

I would highly recommend Sketch for school-age children and adults. He demonstrates the basics of cartoon drawing and more importantly emphasizes to his audience that there are no right or wrong ways to be imaginative. He gives everyone permission to be creative in their own way. And the audience takes that message!

Sketch also shares stories from his own life about the importance of relationships, sadness, being in trouble, disappointment, perseverance, and using your creativity to help you get through hardships in life. Without doubt, some audience members will identify with Sketch through their own similar experiences. Through his stories, they will learn there are good ways of coping and there will be better days ahead.

Indeed, a workshop with Sketch is very valuable for many reasons, not only art.

Sincerely,

Deanine R. Hupe
