

Letter of Recommendation for

Ray “Sketch” Gustafson

My recommendation of Sketch Gustafson is based on over three years of knowing him, observing his work as a graphics artist and cartoonist, and actually requesting a design project that Sketch delivered ahead of schedule and with outstanding quality.

As a Senior Systems Analyst, I've worked with Sketch on some computer builds and configurations of which he quickly and willingly picks up new knowledge and technologies. I've been impressed at his ability to pick up a book and dive into a new piece of software or application to understand all of its capabilities.

Sketch is an “out of the box” thinker, looking for unique ideas to accomplish his goals. The leadership and communication skills are two of Sketch's qualities that I admire the most. I've seen him speak on multiple occasions in front of hundreds of people with great success.

I would highly recommend Sketch Gustafson as an employee of your organization. His energy and enthusiasm would contribute in a positive way to your company's success.
